The aspects of this class I valued most were:

a relaxed atmosphere

Group work and communication enable me learn many things

This class was interesting to me and I enjoyed how the professor was very organized with everything and explained everything extremely well.

In class activities

I enjoyed the lively lecture and participation from my classmates. Verena's teaching style is friendly and informative. We've covered a great deal of material this summer.

Connecting concepts learned in class to the workplace.

Having the professor actively engage us in class participation every day by asking/using real life scenarios involved with organizational behavior.

Participation

I appreciated the logical presentation and the well reasoned format of the lectures.

I really enjoyed how she was able to place all the concepts we learned in class in real situations. By doing so, I was able to understand the material more and really immerse myself in the subject matter.

Improvements to this class (if any) should include:

More details can be added, since the content now is very facial. I want to know more about strategies in leadership ect.

I cannot think of any improvements.

More activities to engage the class and address concepts.

Having more group work/team projects during class because they were fun and not stressful since the assignments were creative. My favorite group work we did was the murder mystery case because it made us use our analytical and organizational behavior skills to deduce who the killer was.

I feel there could have been more discussion about the topics, although there are constraints like time and knowledge stopping this from happening.

None!
